EFFECT OF INVESTIGATION.

Announcement Strengthens Strikers Belief in U. S. Ownership.

The effect of the announcement , federal investigation upon the strikrs is apparent from their belief that the government will assume control of the mines and that none but federation members will be employed. Evidently such is the gist of rantings f the agitators who realize they must esort to desperate arguments to keep the spirits of the strikers buoyant.

Five Italian miners who hitherto have been federation men, today returned to work in the Mohawk mine and a similar number of Hungarian trammers renounced the federation by asking for their positions in the Ahmeek mine. Without exception these men bring reports that others will follow them when it is demonstrated that they will be protected.
